ICD-10 CAUSE-OF-DEATH LISTS FOR TABULATING MORTALITY STATISTICS,  
EFFECTIVE 1999 (UPDATED JULY 1999)

## **Acknowledgments**

This Instruction Manual was prepared in the Division of Vital Statistics (DVS) under the general direction of Harry M. Rosenberg, Ph.D., Chief of the Mortality Statistics Branch (MSB). Kenneth D. Kochanek wrote the text and coordinated production of the lists. Lloyd Reich and Brenda Gillum created the original draft tabulation lists. Kenneth D. Kochanek, Jeffrey D. Maurer, and Linda Le provided extensive content review of the tabulation lists. We would like to thank the numerous reviewers from federal and state agencies for their helpful comments and suggestions that have been incorporated into the final tabulation lists. The tabulation lists were verified by the Systems, Programming and Statistical Resources Branch of DVS.

## INTRODUCTION

This manual presents the lists of causes of death for tabulation and dissemination of mortality data by the National Center for Health Statistics (NCHS) under the Tenth Revision of the International Classification of Diseases (ICD-10) recommended by the World Health Organization (WHO)(1). NCHS will begin using this manual for data year 1999. A total of eight (8) tabulation lists are described. Seven (7) of the lists are used for both underlying and multiple causes of death, and one for multiple causes of death only.

The lists have been developed with three general principles in mind: 1) to separately identify causes of death specified by the WHO in its recommended mortality tabulation lists; 2) to the extent possible, to maintain continuity with past lists for historic continuity and to facilitate trend analysis; and 3) to separately identify causes of death that are of public health and medical importance. In addition to specifying the classification, the WHO - in an effort to promote international comparability - recommends four (4) special tabulation lists for mortality data. These WHO lists are used to tabulate underlying cause-of-death data.

### **Changes from the WHO Tabulation Lists, Ninth Revision**

The WHO tabulation lists of the Ninth Revision of the International Classification of Diseases (ICD-9) have been replaced in ICD-10 by more detailed lists of two types; condensed and selected. The condensed lists are the *Mortality Tabulation List 1, General mortality, Condensed list* (Table H) and the *Mortality Tabulation List 3, Infant and child mortality, Condensed list* (Table J). These lists provide categories for each ICD chapter and also, within most chapters, identify the categories of the selected lists together with residual categories entitled "Remainder of ...", which complete the coverage of the respective chapter.

*Mortality Tabulation List 2, General mortality, Selected list* (Table I) and *Mortality Tabulation List 4, Infant and child mortality, Selected list* (Table K), contain categories within most ICD-10 chapters for conditions and external causes significant for monitoring and analyzing population health status and mortality-related health concerns at both national and international levels. Chapter totals are not provided and only a few chapters have residual rubrics that enable such totals to be obtained.(1)

The four WHO lists from ICD-10 can be constructed from the NCHS tabulation lists by combining selected categories.

## **Methodology**

The ICD-10 mortality tabulation lists were created by a team of health statisticians and medical officers following several steps. First, a complete one-to-one mapping of each category at the 4-digit level of both ICD-9 and ICD-10 was completed to identify the structure of ICD-10 and to highlight changes from ICD-9. The mapping indicated that many categories were subdivided into multiple codes in ICD-10 and that other codes in ICD-10 did not match any ICD-9 codes. Second, the ICD-10 codes were aggregated into groups that were most comparable with ICD-9, except when medical or public health requirements and concerns warranted new combinations or groups of codes. The current ICD-9 tabulation lists were used as a starting point to create the ICD-10 tabulation lists. Third, draft lists were sent for review to key federal and state health agencies for comment. The comments and suggestions were analyzed carefully to make decisions on which causes or cause groups should be included in the final tabulation lists.

## **NCHS Lists**

Eight mortality tabulation lists are described: 1) the List of 358 Selected Causes of Death (Table A); 2) the List of 113 Selected Causes of Death (Table B); 3) the List of 130 Selected Causes of Infant Death (Table C); 4) the List of 39 Selected Causes of Death (Table D); 5) List of 124 Selected Causes of Fetal Death (Table E); 6) the List of Motor Vehicle Accident Deaths (Table F); 7) the List of Injury, Poisoning and Certain Other Consequences of External Causes (Table G); and 8) the Each Cause List.

< The **List of 358 Selected Causes of Death** (Table A), either directly or by combining titles, contains the 103 categories in the WHO *Mortality Tabulation List 1* and the 80 categories in *Mortality Tabulation List 2*. The List of 358 Selected Causes of Death is similar to the List of 282 Selected Causes of Death in ICD-9.

- < The **List of 113 Selected Causes of Death** (Table B) was constructed in part by combining certain titles in the List of 358 Selected Causes of Death. It is used for the general analysis of mortality and for ranking leading causes of death. It is similar to the List of 72 Selected Causes of Death in ICD-9.
- < The **List of 130 Selected Causes of Infant Death** (Table C), which is used for the analysis of infant mortality and for ranking leading causes of infant death, shows more detailed titles for Certain conditions originating in the perinatal period and Congenital malformations, deformations and chromosomal abnormalities than any other list except the Each Cause List. It is similar to the List of 61 Selected Causes of Infant Death in ICD-9.
- < The **List of 39 Selected Causes of Death** (Table D), which is used to show mortality data for geographic areas, was created by combining titles in the List of 113 Selected Causes of Death. It is similar to the List of 34 Selected Causes of Death in ICD-9.
- < The newly-introduced **List of 124 Selected Causes of Fetal Death** (Table E) is used to tabulate cause of fetal death; the structure of the list parallels that of the List of 130 Selected Causes of Infant Death.
- < A special **List of Motor Vehicle Accident Deaths** (Table F) is designed to maximize comparability with ICD-9 lists for trend comparisons. This is necessary because the ICD-10 categories for motor vehicle accidents differ substantially from those in ICD-9. In ICD-9 the focus of the motor vehicle accident section was on the nature of the accident, whereas in ICD-10 the focus is on the victim and the type of vehicle involved in the accident.
- < The **List of Injury, Poisoning and Certain Other Consequences of External Causes** (Table G) is used for tabulating the ICD-9 equivalent of Nature-of-Injury codes. It is derived from Chapter XIX of ICD-10, *Injury, Poisoning and Certain Other Consequences of External Causes*. These categories are used for tabulating multiple causes of death, **NOT** underlying cause of death. For Chapters I to XVIII and Chapter XX of ICD-10, the same tabulation lists are used for both underlying and multiple causes of death.

< The **Each Cause List** is made up of each 4-digit category in ICD-10 that is to be used for underlying cause-of-death classification (codes only, Table L). The Each Cause List --with titles and codes-- is not included in this manual, but will be published in Vital Statistics of the United States, 1999, Volume II, Part A, Mortality (2) and will be available in electronic form on the Internet (<http://www.cdc.gov/nchswww/>), and on request to the Division of Vital Statistics, NCHS.

The causes designated by the symbol # in Tables B, C, and E are eligible to be ranked as leading causes of death for the specified population and infant/fetal groups (2,3).

In addition to the NCHS lists and the WHO lists, this manual includes a list of ICD-10 category numbers that are to be used for underlying cause-of-death classification (Table L), a list of ICD-10 category numbers that are not to be used for underlying cause-of-death classification (Table M), and a list of the category numbers not used in ICD-10 (Table N).
